AUGMENT YOUR RESOURCES WITH VIRTUAL STAFF

Community hospitals may have a difficult time accomplishing objectives due to the astounding number of skills and skill sets necessary to keep technical operations moving. You require someone who has expertise in integration engines. Someone with the ability to manage your electronic medical record is essential. Report writing skills are imperative, which requires knowledge of the underlying databases. Add in point-to-point interfaces, PC programming, system archiving, and dictionary management; the technical skill set needed for everything is overwhelming. It can be especially taxing when your technical staff are unable to keep up with increasing demands.

That is when you need a team that has the experience to save you. The HCI Solution can provide the technical prowess and experience, without the learning curve. With decades of experience in the hospital marketplace, The HCI Solution can help your hospital by augmenting your resources with virtual staff.

HCI'S Engineers can help:

- Understand the requirements to develop the best strategy for integration issues.
- Decide the best way to archive information, based on your requirements.
- Manage a migration to a new platform with testing, implementing, and go-LIVE services.
- Provide a single point of contact to make everything happen for you seamlessly.

THE HCI SOLUTION'S ENGINEERING RESOURCES CAN PROVIDE THE FOLLOWING:

- Data Services · NPR · RD · DR · SQL
- Interface Engine Management
- Systems Integration
- Custom Scripting
- Custom Interfaces
- Legacy System Archiving
- Dictionary Management
- Business Analytics
- Database Management
- Custom Software Development
- Engagement Coordinator
